1. The following is an examiner's statement of reasons for allowance: the examiner accepts applicants arguments that the examples and comparison examples of Suzuki '722 teach away from the claimed ranges in instant independent claims 1 and 10. In particular, the examples of Suzuki '722, which show the best degree of glare reduction, such as example 5, teach greater levels of Rz/Ra than those instantly claimed and the comparison examples of Suzuki '722, which do not have good glare reduction, have levels of Rz/Ra within the range instantly claimed, the instant claimed ranges having good glare reduction as shown by the instant examples. The examiner notes that newly cited Ikegaya et al. '142 and Oka et al. '524 both teach low refractive index layers on top of layers which have surface roughness for diffusion purposes. The examiner does not accept applicant's argument that the limitation of a lower index layer on top of the anti-glare outermost layer distinguishes over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
